Comput. Methods Appl. Mech. Engrg. 162 (1998) 377–378

Computer methods in applied mechanics and engineering

Contents Volume 162

Volume 162, Nos. 1–4, 25 August 1998

Adaptive *H*- and *H-R* methods for Symm's integral equation
T. Cao 1

A numerical solution technique for a class of integro-differential equations in elastodynamic crack propagation problems
F. Costanzo and J.R. Walton 19

Uniformly convergent finite element methods for singularly perturbed elliptic boundary value problems: convection–diffusion type
J. Li and I.M. Navon 49

An arbitrary Lagrangian–Eulerian finite element method for solving three-dimensional free surface flows
A. Soulaimani and Y. Saad 79

Torsion problem of rectangular cross section bar with inner crack
Y.Z. Chen 107

An improved domain decomposition method for the 3D Helmholtz equation
A. Piacentini and N. Rosa 113

Dynamic interaction between the vehicle and simply supported curved bridge deck
V. Mermertas 125

Form error evaluation using L_1-approximation
V.N. Narayanan Namboothiri and M.S. Shunmugam 133

A simple orthotropic, transversely isotropic hyperelastic constitutive equation for large strain computations
J. Bonet and A.J. Burton 151

Hybrid upwind methods for the simulation of unsteady shock-wave diffraction over a cylinder
J. Zółtak and D. Drikakis 165

Computerized design and generation of modified spiroid worm-gear drive with low transmission errors and stabilized bearing contact
F.L. Litvin and M. De Donno 187

An adaptive approach with the Element-Free-Galerkin method
U. Häussler-Combe and C. Korn 203

Modal characteristics of cracked rotors using a conical shaft finite element
M.A. Mohiuddin and Y.A. Khulief 223

Explanation and elimination of shear locking and membrane locking with field consistence approach
L. Yunhua 249

Use of high accuracy schemes to handle free surfaces in computing unsteady two-phase flows
V.M.G. Mollá, J.L.M.-C. González and L.L. Zamora 271

The finite deformation theory for beam, plate and shell Part III. The three-dimensional beam theory and the FE formulation
M. Li 287

Nonlinear static and dynamic analysis of shell structures with finite rotation
J.L. Meek and Y. Wang 301

Element-Free Galerkin solutions for Helmholtz problems: formulation and numerical assessment of the pollution effect
Ph. Bouillard and S. Suleau 317

Studies in material parameter sensitivity of softening solids
M.A. Gutiérrez and R. de Borst 337

The influence of the linearisation of the yield surface on the load-bearing capacity of reinforced concrete slabs
P.C. Olsen 351

Simulation of miscible displacement in porous media by a modified Uzawa's algorithm combined with a characteristic method
D. Yang 359
